

DAFA Brushlists

DAFA brushlists are designed for a wide range of constructions, adjusting to tolerances in the given application, and for fast and efficient mounting.

By using DAFA brushlists the uptime for the wind turbine is optimized, and water, sand, salt and other particles are prevented from entering critical parts such as electronics and hydraulics. Brushlists are produced in weather-resistant materials with low-friction fibers.

Flexible brushlist

Flexible brushlists are available for both clamping and screw mounting.

- Fast and easy assembly.
- Mechanically fastening (screws)
- Flexible for rotating parts
- Brush length from 10- 30mm
- Coil delivery (25m) avoids multiple joints
- Weather resistant
- No waste

DAFA Alu brushlist

Aluminum brushlists are designed with either a straight or angled aluminum holder for mechanical fastening.

- Angled brushlists are delivered in 1m lengths
- Straight brushlists are delivered in 1m and 3m lengths
- Low friction
- Weather resistant

Custom-made solutions

The above listed profiles are DAFA standard brushlists. If these profiles don't fit your construction, then we can offer other standard brushlists or develop a specific customized profile.

The invisible lines that make wonders happen

At DAFA we are experts in specialized products and total solutions that seal, absorb and protect.

With uncompromising product quality, constant innovation and close collaboration with customers we contribute to successful projects in industries where attention to detail is the difference between success and failure.

Our experience covers three quarters of a century, and our solutions are at work all over the world. Our global supply chain means that we deliver to any location efficiently and at competitive prices.
